## WORK EXPERIENCE

### Full-Stack Software Engineer

*Atria Senior Living*, September 2019 - Present

- Create a Design System implementation plan and code examples for developers across the entire department.
- Develop applications for daily operations in all communities and improved processes of charting and leasing by providing a digital solution.
- Lead the upgrade of technologies from web forms to .NET Core for the Operations team.
- Upgrade front end technologies from pure HTML, CSS, and JavaScript to Angular with Bootstrap 4.
- Provide a deep understanding of all aspects of software design with a demonstrated track record of increasing productivity.
- Complete detailed programming and development tasks utilizing MVC.NET/C#, JavaScript, CSS, and SQL.

### Lead Web Developer

*Bisig Impact Group*, April 2018 - September 2019

- Maintained portfolio of sites along with minor changes and adjustments.
- Lead clients through the SDLC cycle from design to development.
- Projected development hours and shared task priority to developers and freelancers.
- Lead a group of 5 freelance developers, testing code changes, providing feedback for pull requests, and communicating client needs through Trello.
- Troubleshooted tasks and communicated issues with Product Managers, allowing for efficiency within the team of developers.

### Freelance Web Developer

*Emmykaye Creative*, October 2016 - September 2020

- Created websites for small business and advertising agencies.
- Discussed requirements with clients to develop projected dates and proposals.
- Lead milestone discussions and adjusted based on feedback.
- Utilized agile development processes to efficiently include client requirements within development efforts.
